Subject: Zoom Storage for Recordings (to whom it may concern)
To: David Roethler <david@roethler.at>

Dear fellow Zoom users,

May I kindly remind you to download and delete your recordings, if feasible. Storage on Zoom is limited and quite expensive...

Thank you very much for your help and understanding! ;-)

Keep in mind to update your Zoom client frequently as new features are being added constantly. E.g. you can activate automatic live transcription (currently only in English). Furthermore our account has now very high video quality (Full HD, 1080p). For large meetings we have the option of up to 100 breakout rooms.

Best wishes and happy zooming!
David
