Dear addressees, pioneers of the multichannel CI

During the ESPCI Conference in Hannover we had a Round Table under the title „Ernst Lehnhardt Memorial Session – The beginning of multichannel CI in Europe“

on June 12 which I had the pleasure to moderate. Prof. Dr. Thomas Lenarz kindly made the introduction.

We can provide the link to the recording in the very near future.

While 8 pioneers from Germany, France, Spain, UK and the Czech Republic attended many were missing. It would have exceeded the scope of the RT.

After the topic was received very positively, we decided to continue and try to create a complete documentation.

This is the reason why I am contacting you today. If I remember correctly, you were actively involved in this early time and I sincerely hope you will agree to share your memories with me.

We would meet online for a short (7 – 10 minutes) interview. (online). Provided you accept this proposal I would send you a few questions before so that you can prepare your answers.

It would also be highly appreciated if you have a couple of photos that fit the topic.

Kindly let me know whether this sounds good to you and let me have two or three time slots when it would suit you well. I will then send the link to my Zoom room.

It seems I have 18 candidates for this project, not only from Europe!

Very much looking forward to hearing from you!

Best regards

Monika
